## **SPL Series**

Extended L-Band Splitters/Combiners Passive (2-way, 4-way, 8-way, 16-way)

# Made in Germany

#### **GENERAL**

The SPL Series represents high quality passive L-Band Splitters/Combiners available as 2-way, 4-way, 8-way or 16-way splitting/combining configuration. Each Splitter/Combiner module is housed into a robust and compact aluminum enclosure and can be used for standalone operation, but also can be integrated into various available 19" rack-mount panels for installation into a 19" cabinet.

This units operate within the extended L-Band frequency-range (850...2450 MHz) ready for KA-Band and HTS applications and are available with 500 hm SMA(f) or BNC(f) as well as 750 hm F(f) or BNC(f) connectors.

These passive Splitters/Combiners feature high quality, excellent RF performance and are perfectly suited for Satellite-, Broadcast and Broadband RF distribution infrastructures such as for Teleports, Earth-Stations or Cable/IPTV headend operations.
